

ADVANCE DESIGN
FOR ALL CLINICAL INDICATIONS

THE NEW MODERN DESIGN
IN IMPLANT DENTISTRY

LEVEL

MODE LEVEL
New Tapered Design
for All Clinical Indications

ModeLEVEL provides perfect balance between high primary stability and gentleness to the bone, which makes it highly convenient implant for immediate implantation and loading.

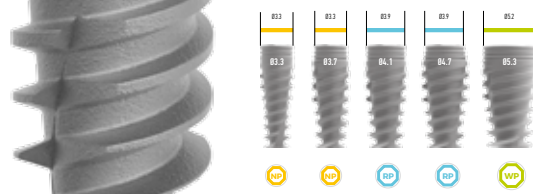

- Better initial stability for all bone types
- From Single to Multiple Unit
- One Stage or Two Stage Surgical Procedures
- Immediate & Early & Delayed Loading Protocol

RAPID

MODE RAPID
Advance Design
for Unique Clinical Results

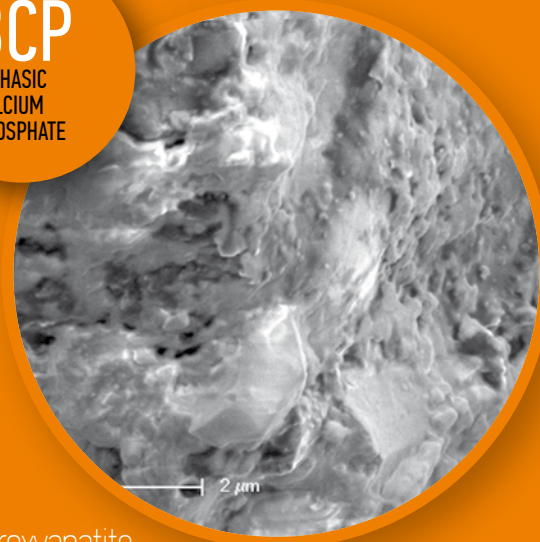

Immediate Implantation & Immediate Loading

- Excellent Primary Stability even in Soft Bone
- From Single to Multiple Unit
- One Stage or Two Stage Surgical Procedures
- Immediate & Early & Delayed Loading Protocol

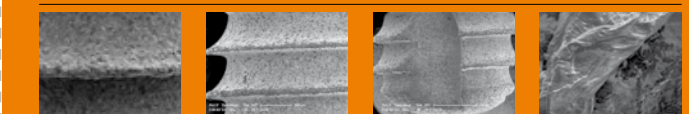

BIOCOMPATIBILITY CLEANLINESS
OSSEOINTEGRATION

OSTEOBLASTIC BCP
SURFACE MORPHOLOGY

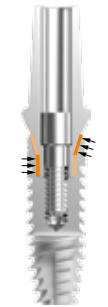

Perfect HA Osteoblastic homogeneous surface morphology BIC Bone-Implant Contact provides perfect combination with human body and 100% biocompatible BCP Biphasic Calcium Phosphate under favour of Optimum Osseointegration.

INTERNAL CONICAL
OCTAGON CONNECTION
Innovative Octafit Implant-Abutment Connection System

Morse Taper Implant-Abutment conical connection system decomposes the points forces, consists of overloading stresses, to the conical surfaces.

Perfect mechanical connection design minimizes the possible load to the center and connection screw in Implant-abutment correlation.

OCTAFIT «Color Code Platform Concept»

SURGICAL KITS

STANDARD KIT

Ergonomically designed surgical kit, best fit for physician's needs.

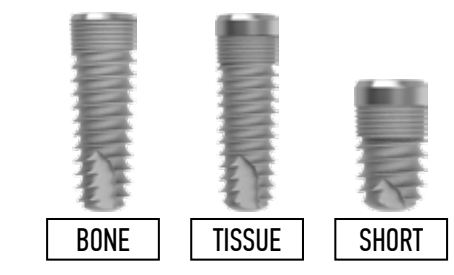

QUICK KIT

Quick Kit designed for your individual needs, light and compact.
